-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The following are each a double inclusion of an element, i.e. the element is being reintroduced into the claims: claim 1, lines 7, 8 and 10-12, “two fixed points”, “one fixed point”, “windshield vents” and “center vents”.

In claim 2, line 1, “said hooked device” is unclear insofar as a plurality of hooked devices were previously defined in the claims.

In claim 2, lines 1 and 2, “said hooked device which is an article” lacks antecedent basis in the claims.

In claim 2, last two lines, “a gap of said vents” and “an edge or bridge of said vents” is unclear insofar as all of the vents do not include a single common gap, edge or bridge, i.e. a single gap, edge or bridge appears to be located in only one of the plurality of vents.

Part (b) of claim 3 is unclear with respect to whether the step includes securing the devices on the vents or whether the step is providing devices which are capable of being secured on the vents, i.e. whether the step involves the action of securing the devices on the vents or not. Part (c) appears to be defining the fastening as an intended use rather than a positive recitation of the securement (“for fastening said holder on the dashboard”).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1 and 2, and claim 3, as best understood in view of paragraph 1 above, are rejected under 35 U.S.C. 102(a) as being anticipated by Tyrer (fig. 7 emb). Tyrer discloses a container or holder including three cords or ropes with hooks at the ends. No distinction is seen between the container or holder claimed and that shown in Tyrer as a result of the claimed intended use of the hooks to secure the container or holder to the windshield vents and center vents of a vehicle, i.e. the container or holder of Tyrer is considered capable of being fastened to the vents. Also, with respect to claims 1 and 2, no distinction is seen between the holder or container claimed and that of Tyrer as a result of the claimed intended use of the holder to become a handbag or shoulder bag once released from a dashboard, i.e. the bag of Tyrer is capable of being carrier over the shoulder or by hand once released from the vehicle.

4. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Also, Applicant may contact the Examiner at the telephone number below to arrange an interview pursuant to obtaining constructive assistance with the application.

Conclusion

The remaining cited prior art is illustrative of the general state of the art.

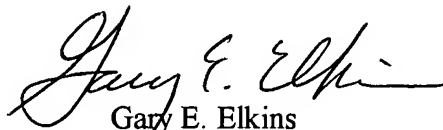

In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses in Office Actions to (703)872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a PTO deposit account.
